CARE FOR THE ENVIRONMENT

AND HOW YOU CAN HELP

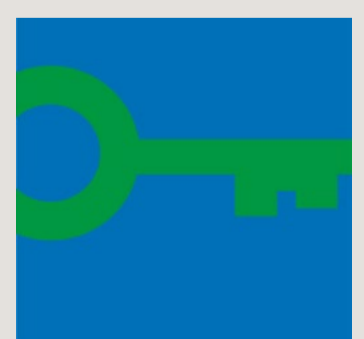

Sustainability is at the heart of Montcalm Chilworth Townhouse, shaping our design, guest experiences, and commitment to sensitive luxury.

We are committed to driving positive, sustainable change through our practices, and minimising negative impacts on the environment. Our hotel operates with care for the environment in mind, following the standards of the Green Key certification.

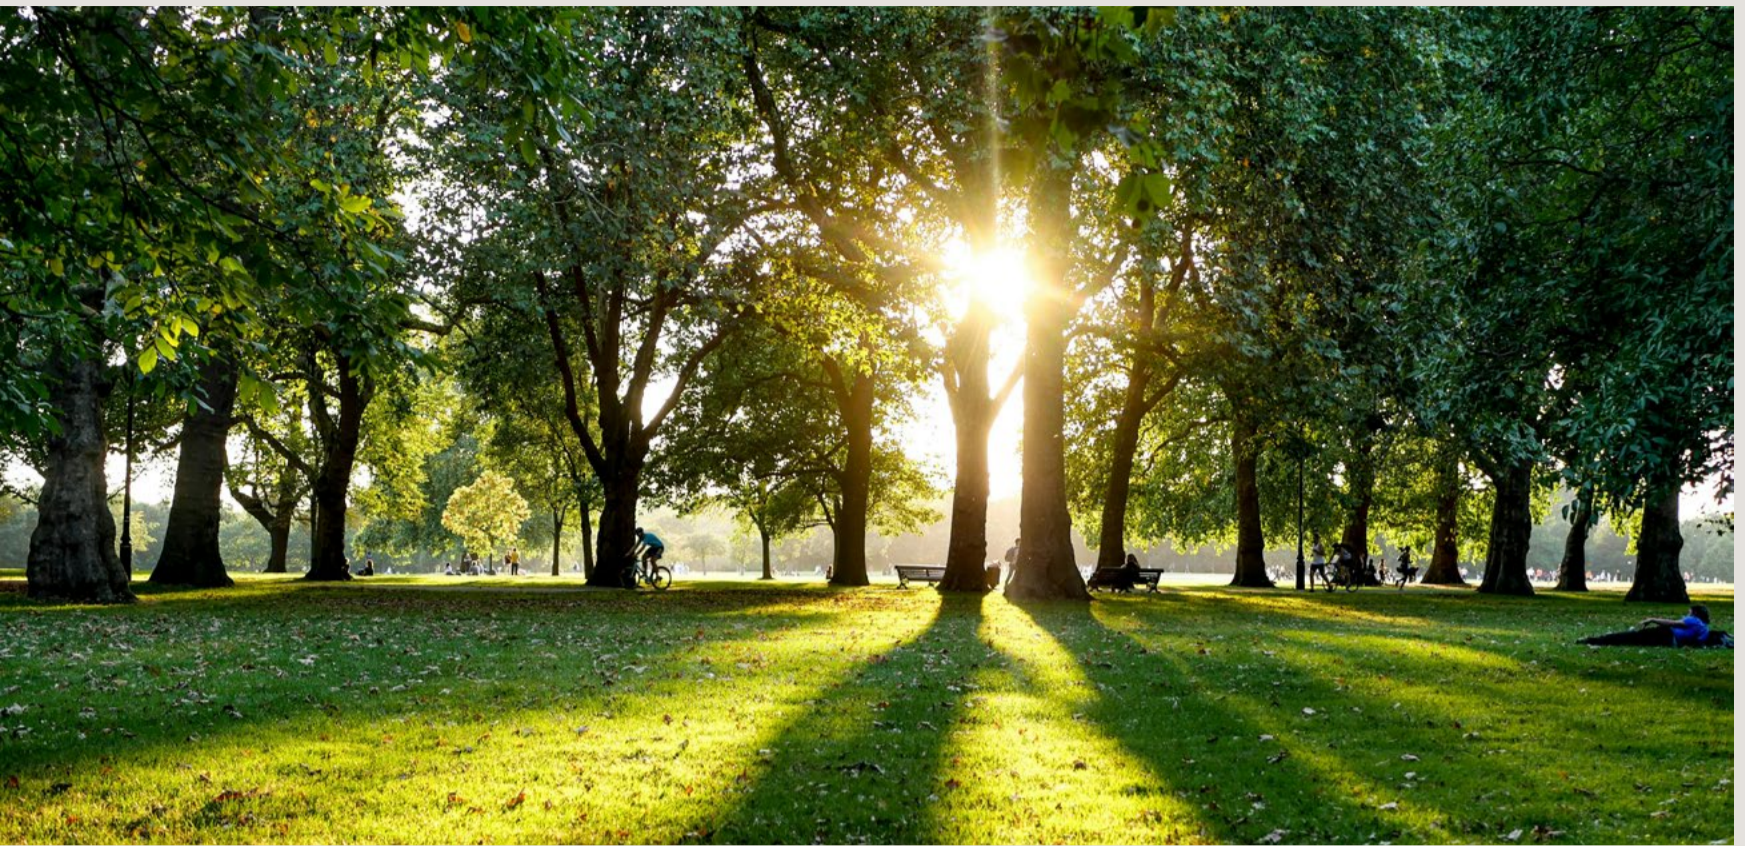

Green Key is a leading framework of excellence in sustainable operations within the tourism industry. We follow their high environmental standards with rigorous documentation and regular on-site audits.

For guests, a Green Key verifies that a hotel is committed to reducing the environmental impact of their stay.

Green Key

WHAT WE DO

AND HOW YOU CAN JOIN THE MISSION

We have implemented eco-friendly practises throughout our hotel, and there are many ways you can join our mission for a sustainable stay.

SINGLE USE PLASTIC-FREE

We have eliminated single use plastics from all guest rooms, for example by providing filtered water in daily refilled glass bottles and using refillable toiletry dispensers.

Join the mission by using our complimentary water instead of buying plastic water bottles during your stay.

WASTE MANAGEMENT

We recycle cardboard, plastic, glass, and food, by separating and sorting all waste during daily turnovers. All non-recyclable waste goes to energy recovery instead of landfill.

Join the mission by not putting any liquids or food in your bins, unless they are carefully wrapped, so you don't contaminate the recyclable waste. Additionally, please do not flush any items in the toilet other than toilet paper, as they will not dissolve and can block and pollute waterways.

SAVING WATER

We have water-efficient taps, showers, and toilets. Bed linen will be changed every three days or upon request. Towels will be replaced only if left on the floor and may be reused by hanging them. If you wish to have your linens and towels replaced more frequently, please contact reception.

Join the mission by reusing your towels by leaving them on the towel rack. Try taking shorter showers, and don't leave the tap running unnecessarily.

SAVING ENERGY

We have energy efficient systems and appliances, and a key card system that automatically turns off the lights and heating when guests leave their room and take their key with them.

Join the mission by making sure to always remove your key card from the room when you are not using it.

SUSTAINABLE TRANSPORT

When you ask us for a taxi, we will always try to get you an electric one. Our concierge can also help you find other sustainable transport options.

Join the mission by trying out sustainable ways of getting around such as renting bicycles, walking, or the tube. They are quicker than cars too.

GREEN ACTIVITIES

London has many green oases to spend some time with nature in the midst of our bustling city. Our concierge can help plan your visits to these refreshing urban retreats.

Join the mission by asking our concierge about visiting green spaces such as the historic Finsbury Circus Garden, the breath-taking Sky Gardens, or the inspiring Barbican Conservatory.

**Thank you for helping us create
a more sustainable future.**
